- ***Do not place furniture in direct sunlight.*** *n atural solid wood furniture will naturally color as it ages, however, direct sunlight dramatically speeds up the process.*

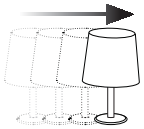

- *In natural wood furniture, the variations in texture and grain* ***will affect the finish****, making it impossible to guarantee an exact match between two pieces of wood even though identical finishing processes are used. these differences in character* ***are not defects****, but variations that make each piece of furniture unique and beautiful.*

- ***Solid wood naturally expands and contracts.*** *In high humidity you may find that drawers can stick slightly. this will correct itself, and is not reason for concern.*

- ***Do not place furniture over heating or cooling vents.*** *Dramatic changes in temperature can cause the wood to split.*

- *If you place objects such as lamps or plants on your case pieces* ***make sure to move them from time to time.*** *there may be a slight discoloration where the object was. However, by exposing it to light the color will catch up to the rest of the case.*

- *Plastic or foam footed items such as phones or clocks can damage this finish,* ***use trivets under such items.***
